NetShelter SV 48U 600mm Wide x 1060mm Deep Enclosure with Sides Black|APC

Vendor-neutral EIA-310 19in Rack Mounting Compatibility Guaranteed

Schneider Electric Rack Systems Compatible

Safety

Agility

Vendor-neutral mounting for guaranteed compatibility with all EIA-310 compliant 19" equipment. The "Fits Like a Glove" money back guarantee provides peace of mind that all of your EIA-310-E compliant rack-mount equipment will physically fit in a NetShelter.

Compatible with a variety of Schneider Electric rack accessory products to provide the ability to create a complete rack system. Configure rack solutions using industry leading Schneider Electric Design Portal - Small IT Solution Designer configurator complete with verification of product compatibility and useful 3rd party equipment catalog to aid in visualizing your ideal rack solution.

The roof, side panels and front and rear doors are grounded to the frame of the enclosure. Eight additional electrical grounding inserts are located on the frame for external grounding.

Enclosure is delivered with bolt-down brackets that secure the enclosure to the pallet during shipment. These same bolt-down brackets can be utilized to bolt the enclosure to the floor at the final installation site.

Enclosures include pre-installed joining hardware for joining enclosures in a row and provide additional stability to the enclosure. Enclosures are pre-installed with joining brackets for joining enclosures on 600-mm centers. Joining brackets for joining enclosures on 24-in centers are included with the provided hardware kit.

Not all installation sites have space clearance required to move and install standard height enclosures. This unassembled option is packaged for transport through narrow spaces and assembly at the installation site.

Split rear doors improve access and serviceability to rear of rack mounted equipment. The split rear doors help to maximize floor space. Only 11 inches (279 mm) of clearance is required behind the enclosures to allow for door swing.

Enclosures are shipped standard with both leveling feet and castors. Leveling feet can be adjusted using a wrench from underneath the enclosure.

Integrated and adjustable rear accessory mounting brackets provide zero U mounting locations for toolless accessories. Each bracket has two mounting bays to support a combination of up to four accessories such as Rack PDUs and vertical cable organizers mounted inside the rack. Adjust the brackets from their standard factory positions or install additional brackets (AR824002 - Qty 2) to install half enclosure height accessories such as cable managers and vertical Rack PDUs.

The vertical mounting rails can be adjusted in 0.4 in (10 mm) increments covering virtually any mounting requirement for IT equipment. Align the mounting rails with the opposite side of the enclosure by identifying the hole position used. U positions are numbered front and back for rapid installation of equipment.
